

CRIMINAL ALIEN STATISTICS

Summary: On average each day 25 Americans die at the hands of criminal aliens in the United States. Twelve Americans are murdered by criminal aliens. Another ten Americans are killed by drunk-driving criminal aliens. Finally, an additional three Americans will die because of negligent homicides by criminal aliens, such as running a red light, speeding, or the negligent handling of a dangerous weapon.

Murder - The willful (non-negligent) killing of one human being by another. This includes first and second-degree murder, as well as non-negligent manslaughter. Murder does not include deaths caused by negligence, suicide, or accident; justifiable homicides; attempts to murder or assaults to murder, which are considered "aggravated assaults."

Negligent Homicide - Negligent homicide is the killing of another person through gross negligence or without malice. It can also be considered a death that is the result of the negligent operation of a motor vehicle, which includes the operation of a car, boat or snowmobile.

Source: Iowa Representative Steve King (IA-5) first brought these alarming statistics to our attention. Congressman King was the guest of Bill O'Reilly who had asked the Iowan come on his show to discuss his findings in greater detail.

Statistics:

Criminal Alien Prison Population -

According to an April 7th, 2005 General Accounting Office (GAO) study entitled, "*Information on Criminal Aliens Incarcerated in Federal and State Prisons and Local Jails*" [Report # [GAO-05-337R](#)] prepared for the Congressional Subcommittee on Immigration, Border Security, and Claims:

"27% of the total population in all U.S. prison systems (including city, county, state and federal) is composed of criminal aliens."

Total Murders in the U.S. in 2005 -

According to the FBI, there were 16,692 persons murdered in the U.S. in 2005. The Uniform Crime Reporting Program defines murder and non-negligent manslaughter as the willful killing of one human being by another.

Total Drunk-Driving Fatalities in the U.S. in 2005 –

According to the National Highway Traffic Safety Administration, 12,945 Americans were killed in car crashes where the driver had a blood alcohol concentration of .08g/dL or higher in 2005.

Calculations:

Total number of people murdered in the U.S. at the hands of criminal aliens in 2005: **4,507**

This number is calculated by taking 27% multiplied by the total number of murders in the U.S. in 2005 ($.27 \times 16,692 = 4,507$)

This figure equals approximately **12 murders every day** at the hands of criminal aliens ($4,507 / 365 = 12$)

Total number of people killed in the U.S. as a result of drunk-driving criminal aliens in 2005: **3,495**

This number is calculated by taking 27% multiplied by the total number of alcohol-related fatalities in 2005 ($.27 \times 12,945 = 3,495$)

This figure equals approximately **10 deaths every day** at the hands of criminal alien drunk drivers ($3,495 / 365 = 10$)

Conclusions:

Twenty-five Americans die at the hands of criminal aliens every day in the U.S.

(12 murders + 10 drunk-driving fatalities + 3 negligent homicides = 25 deaths every day)

In the year 2005, criminal aliens killed more than three times the number of Americans murdered in the terrorist attacks of 9-11 died.

9,125 Americans died at the hands of criminal aliens in 2005, as compared to approximately 3,000 Americans who perished in 9-11.

Additional Statistics:

Federal prison criminal alien population:

Total number of criminal aliens in federal prison: 48,708

Mexico 63%, Colombia and Dominican Republic 7% each, Jamaica 4%, Cuba 3% and El Salvador 2%, remaining countries represent less than 2% each.

Source: Bureau of Prisons (BOP)

Top 5 State prisons system criminal alien population:

Total number of criminal aliens in top 5 states' prison systems: 51,600

Mexico 58%, Cuba and Dominican Republic 5% each, El Salvador 4%, Jamaica 3%, remaining countries represent less than 3% each.

Top 5 local jails' criminal alien population:

Total number of criminal aliens in top 5 states' prison systems: 170,000

Mexico 65%, El Salvador 6%, Guatemala 3%, remaining countries represent less than 3% each.

Assumptions:

- This methodology assumes each victim was killed by a separate criminal alien in federal prison.
- If any criminal aliens incarcerated in federal prison were responsible for more than 1 victim, this statistic will only increase.
- This methodology assumes the types of crimes committed by federal prisoners is spread uniformly across citizenship statuses.
- If criminal aliens are responsible for more homicides and vehicular manslaughters than citizens, this statistic will increase.
- This methodology does not include any criminal aliens incarcerated in state prisons which would also make the statistic higher than currently reported.
